Trenchless
Innovations
can help!

BREATHE EASIER!

A major source of unseen mold, rust and other contaminants, is often your air ducts. Correcting the problem is nearly impossible without tearing up your home and replacing the air duct system.

Now, Trenchless Innovations® can coat your air ducts with a safe and environmentally friendly liner that applies quickly and eliminates impurities circulating in your home.

COAT YOUR AIR DUCTS

Step 1

A **video inspection** of your air ducts can spot the exact location of any mold, corrosion or problem areas.

Step 2

We **line the interior of your air ducts** with a specially designed material that neutralizes problem areas, completely coats the duct work surfaces and hardens for a strong and long-lasting seal. The process is quick, fully approved and does not damage your home.

Step 3

A final **quality control video** inspection will show the difference!

Duct coating protects your family and your home

- ▶ Eliminate airborne mold, rust and corrosion
- ▶ Environmentally friendly materials
- ▶ Quick and long lasting
- ▶ Safe and approved
- ▶ Improves air flow

Trenchless Innovations®
uses a similar process
to solve most
sewer problems!

Repairing sewer lines is time consuming, expensive and damages property. Trenchless Innovations, using the special lining process, has changed all that.

- ▶ **Repair sewer lines with a strong and effective liner**
- ▶ **Eliminates damage to foundations, walkways and landscaping**
- ▶ **Lower cost**
- ▶ **Shorter down time**
- ▶ **Safe and long lasting**
